

HIGH OCTANE[®]

SHOW SUPPLEMENT

NET WT. 40 lb (22.66 kg)

ALLEVIATE[™]

SUPPLEMENT

FOR SHOW CATTLE, PIGS, LAMBS AND GOATS

FORMULATED TO SUPPORT OPTIMAL PH IN THE DIGESTIVE SYSTEMS OF SHOW ANIMALS

- Supports GASTRIC and RUMINAL HEALTH for optimal performance
- Designed to SUPPORT PROPER pH in stressful situations
- Enhance your feeding program and results for pennies per day

Features:

Formulated to support gastric health

Designed to support proper ruminal pH

Flexible feeding

Very palatable

No added copper

Convenient feeding directions

Designed as part of an overall digestive health program

Benefits:

- Supports optimal gastric pH in show pigs
- Supports optimal rumen pH in cattle, lambs, and goats fed for exhibition
- Fed twice per day with normal feedings, or as a snack during periods of stress
- Helps support optimal intake
- Can be fed to lambs
- Daily feeding rates for each species based on bodyweight (see feeding directions)
- Contains a proprietary and exclusive active agent

DIRECTIONS FOR USE

HIGH OCTANE[®] ALLEVIATE[™] Gastric Support Supplement is formulated to support gastric health and proper pH for cattle, pigs, lambs and goats fed for exhibition.

The amount fed per day depends on the species, age and weight of the animal. Feed according to the directions below.

SHOW PIGS: Feed 2 ounces per day for every 50 lbs. of bodyweight up to 8 oz per day under normal feeding conditions. (example: 50 lb. pig = 2 oz/day; 200 lb. pig = 8 oz/day). During periods of stress, feed an additional 2 oz/day during the middle of the day as a treat or snack. The peak period of stress is usually 150 lbs. to show.

SHOW CATTLE: Feed 12 to 24 ounces per day as a buffering agent. During periods of stress, bloat, and/or acidosis, feed 24 ounces per day.

SHOW LAMBS/GOATS: Feed 1 ounce per every 50 lbs. of body weight per day. During periods of stress, feed 2-4 oz per day.

CAUTION: Store in a dry, well-ventilated area protected from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness, performance loss or death. USE ONLY AS DIRECTED.

RECOMMENDED DAILY FEEDING AMOUNT (oz/day)

Cattle	Pigs	Lambs	Goats
12 to 24	2 to 8	1 to 4	1 to 4

GUARANTEED ANALYSIS

Crude Protein (Min) 16.00%

HIGH OCTANE[®] Alleviate[™] Supplement – 40 lb

HIGH OCTANE[®]

SHOW SUPPLEMENT

ALLEVIATE[™]

SUPPLEMENT

FOR SHOW CATTLE, PIGS, LAMBS AND GOATS

High Octane[®] ALLEVIATE[™] Supplement as Part of an Overall Digestive Health Program

It is estimated that over 80% of Show pigs experience gastric health issues affecting overall performance. Acidosis (the result of low rumen pH) causes ruminants to be off feed with digestive stress. Gastric health and ruminal acidosis are exacerbated in the show industry due to feeding systems, management systems and the inevitable stressors of the show ring world.

SOME GOOD MANAGEMENT PRACTICES INCLUDE:

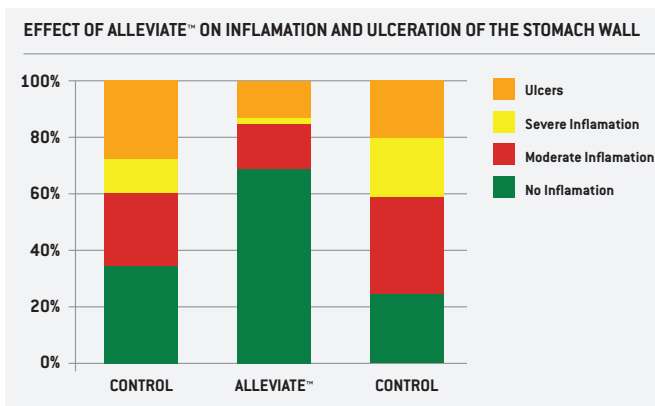

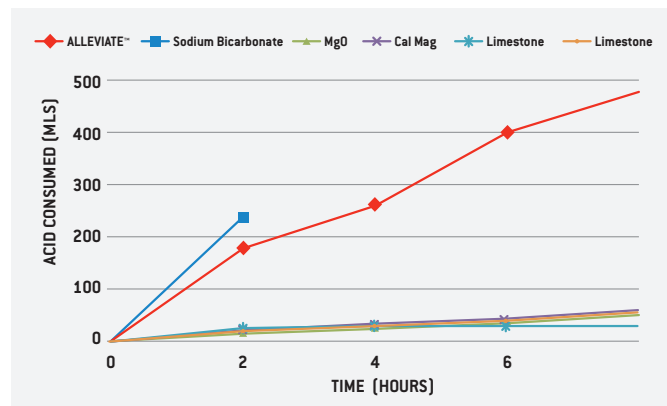

- Feed a quality show feed for modern show animals.
- Be consistent with feeding times and amounts.
- Never skip or miss a meal.
- Make sure water is always clean, fresh, cool and abundant.
- When making nutritional changes, take 3 to 5 days to transition from the old feed to the new, mixing them at 75:25, 50:50, 25:75 (old:new feed, respectively) and finally 100% of the new feed.
- Start High Octane[®] supplements slowly and increase slowly.

POSSIBLE SOURCES OF STRESS:

- Anxiety
- Fear
- Fasting
- Social stress
- Fatigue
- Prolonged transportation

BE ALERT FOR SIGNS OF STRESS:

- Acute diarrhea
- Vomiting
- Weakness
- Nervousness
- Agitation
- Off feed

GUARANTEE - Purina appreciates your business. If you are not satisfied with the quality of this product, please return the unused portion to your place of purchase for a replacement or full refund.
